

LOGIXO

DISTRIBUTION BUSINESS MANAGEMENT SYSTEM

◆ GROWTH PLAN ◆

Overview

Logixo is a purpose-built solution for modern distribution businesses. It brings every critical operation — sales, inventory, finance, fleet, and workforce — into one powerful unified system.

No more scattered tools. No more manual tracking. No more end-of-day guesswork. With Logixo, you gain complete visibility and control over your entire distribution operation from a single dashboard.

Whether you're running a small wholesale agency or scaling up a growing distribution network, the Growth Plan gives you all the tools and insights to scale your distribution business efficiently — with clarity, confidence, and complete control at every stage of growth.

Pricing

Plan	Monthly	Yearly (Save 2 Months!)
Growth Plan	Rs. 19,900 per month	Rs. 199,000 per year

No hidden charges • Cancel anytime • Full support included

Who Is This Plan For?

The Growth Plan is built for expanding distribution businesses and ambitious operators who need more than just basic billing — they need full fleet visibility, deeper reporting, and the operational muscle to scale with confidence.

This plan is the perfect fit if you:

- ◆ Run a growing wholesale or distribution operation with multiple vehicles and routes
- ◆ Need full fleet management — not just vehicle registration, but live dashboards, alerts, and route planning
- ◆ Want comprehensive reporting including expense breakdowns alongside sales and credit reports
- ◆ Require a system that scales with your team, your fleet, and your customer base
- ◆ Are ready to move from reactive management to proactive, data-driven operations

Core Features

Dashboard

A real-time command centre for your business day. The moment you log in, see total sales, outstanding collections, recent bills issued, and recent payment activity — all in one glance. No need to dig through records to know where you stand. The dashboard gives you instant situational awareness so you can make faster, smarter decisions every single day.

Bill Management

Create, edit, view, and print professional customer invoices in seconds. Each bill is tracked from the moment of issuance through to full payment or credit settlement. Whether a customer pays on the spot, by cheque, or on credit — every transaction is recorded with accuracy and accountability. Say goodbye to hand-written bills and untracked payments.

Credit Management

Keep a clear record of all credit extended to customers. View outstanding credit balances at a glance, monitor which accounts are growing, and take timely action to recover dues before they become bad debt. The Credit Management module gives you the discipline and oversight needed to protect your cash flow and maintain healthy customer relationships.

Cheque Management

Record and track every cheque payment received from customers in a structured cheque register. Monitor the status of each cheque — whether it is pending clearance, successfully cleared, or returned due to a bounce — with automated due-date alerts to keep you informed. Never lose track of a post-dated cheque again.

Expense Management

Log daily operational expenses — fuel, vehicle maintenance, loading charges, miscellaneous costs — and keep them clearly separated from your revenue figures. This ensures your daily profit calculations remain accurate and meaningful. At the end of the month, you'll have a clear breakdown of where your money went, helping you cut waste and improve margins.

Fleet Management

Take full command of your delivery fleet with four powerful sub-modules. Vehicle Management lets you register and maintain a complete record of every vehicle in your fleet. The Vehicle Dashboard gives you a real-time operational view of your entire fleet at a glance — which vehicles are active, assigned, and on the move. Alerts notify you proactively about maintenance deadlines, licence renewals, and other critical fleet events before they become problems. Route Plans allow you to

design and optimise delivery routes in advance, ensuring every vehicle follows the most efficient path every single day.

Report Features

Day Summary Report

Close every business day with complete financial clarity. The Day Summary Report gives you a consolidated end-of-day snapshot — total bills issued, cash collected, cheques received, credit extended, and expenses incurred — all in a single, printable view. Perfect for daily reconciliation, this report ensures nothing slips through the cracks and your records are always balanced and audit-ready.

Credit Age Report

See exactly how long each outstanding invoice has been unpaid, grouped by customer and sorted by age. The Credit Age Report is your early-warning system for overdue accounts. Identify high-risk balances before they become unrecoverable, prioritise your collections, and maintain a healthy receivables position. Pro-active credit management starts here.

Expense Report

Get a full breakdown of every operational expense incurred over any selected period. View costs grouped by category — fuel, maintenance, loading, miscellaneous — and compare them against revenue to understand your true profitability. The Expense Report is your financial lens on operational efficiency, helping you identify where costs are rising and where margins can be improved.

Admin & Setup Features

Supplier Management

Maintain a comprehensive, organised directory of all your suppliers — complete with contact details, product lines supplied, and purchase history. This module supports smarter reordering decisions, faster reconciliation of supplier invoices, and a professional record of your supply chain partners.

Route Management

Define and manage the sales routes your delivery vehicles follow every day. Assign customer shops to specific routes to ensure every stop is planned, accountable, and optimised. Well-structured routes reduce travel time, fuel costs, and missed deliveries — directly improving your bottom line.

Vehicle Type Management

Configure and standardise vehicle categories — such as van, lorry, or three-wheeler — used across the system. Correct vehicle classification ensures that all assignment records, route logs, and operational reports are accurately categorised and easy to filter.

Warehouse Management

Manage one or multiple warehouses from a single, unified interface. Define warehouse locations, assign stock to specific storage areas, and control which teams have access to each facility. Warehouse Management ensures that stock movements, transfers, and valuations are always accurate and traceable — giving you the operational backbone needed to run a multi-location distribution business with confidence and precision.

Shop Management

Maintain a complete, up-to-date directory of every customer shop you serve. Store each shop's address, primary contact person, assigned delivery route, and agreed credit terms in one place. This master record ensures every customer interaction is informed, professional, and consistent.

User Management

Add unlimited members to your Logixo account. Set secure login credentials for each user and define exactly what each person can view or edit within the system. Role-based access control ensures that sensitive financial data stays protected, while each team member can do their job efficiently.

Account Settings

Tailor Logixo to reflect your business identity. Configure your company name, logo, operating currency, applicable tax settings, and system-wide preferences so that every document and report carries your brand and meets your local regulatory requirements.
